

# SPRING NEWSLETTER 2018

Anglia Heating Training Ltd, are very proud to announce that we have become sponsors of a local Suffolk/Norfolk Girls football team. The Bungay Town Girls Under 13's, very proudly play in their away kit with our sponsorship. We would like to thank Mr Overalls of Wymondham for the printing of the shirts. Coming almost to the end of their second season, the girls were very happy to receive the new kit. We shall continue to support the team when they move up next year to the U 14's!

## TECHNICAL BULLETIN 001 UPDATE

As most of you may know, Technical Bulletin 001 (Gas Industry Unsafe Situations procedure) has been changed to IGEM/G/11, and has been amended and extended. All Gas Safe registered engineers can access this via the Gas Safe website.

## BOATS

We are very pleased to say we have recently been certificated for CCLP1 /B -LPG Safety for boats. We have run two courses so far, both with excellent feedback. Please enquire with our office for details.

## BOILER PLUS - Energy Saving Technology

From April 2018, when a gas combination boiler is installed in a domestic property in England, an additional energy efficiency measure will be mandatory. Because every house is different, this requirement is flexible to allow a suitable choice to be made that reflects the nature of the building and the needs of the household. The Energy Saving technologies that can be used are:

- \* Flue gas heat recovery systems,
  - \* Weather compensation,
  - \* Local compensation and
  - \* Smart controls with automation and optimisation functions.
- For full details please contact our office

## CMDDA1

As the industry grows, and engineers and companies are requiring more qualifications, we will endeavor to keep up where possible, with supplying new courses to cover requirements where needed. We are proud to announce we are now certified to run the CMDDA1 course: ( Carbon Monoxide / Dioxide in Domestic Dwellings).

## MLP - Managed Learning Program

The new program for entry into the Gas Industry is working well, and the feedback we have received is very encouraging. The positive aspect of the change is that courses can be altered to suit the candidate, but still be covering the legal criteria. All areas of the industry can be entered via the MLP program, we are currently offering Domestic, Commercial, Catering, LPG and Boats MLP for new entrants.
